George Inglis, Ph.D.

Éditeur adjoint à Communications Biology chez Nature Portfolio

Navigating Scientific Publishing in the Nature Portfolio

Dr. George Inglis is a Deputy Editor at Communications Biology, a broad-scope open access journal in the Nature Portfolio. George received his PhD in Genetics and Molecular Biology from Emory University in Atlanta, USA, where his research focused on mouse models of voltage-gated sodium channel dysfunction, epigenomics and in vitro models of neuronal development. George started his editorial career at Communications Biology as an Associate Editor, before joining the Research Cross-Journal Editorial team. As a Cross-Journal editor, he also worked with the teams at Nature Cell Biology, Nature Neuroscience, Nature Aging, Nature Structural & Molecular Biology, Nature Microbiology, and Nature Biomedical Engineering. He rejoined Communications Biology as a Deputy Editor in June 2025 and is based in Springer Nature's office in New York City.
